

TECHNOLOGY DEVELOPMENT CONTRACT

(Commissioned)

CleanHub

Pressing · Car Wash · Laundry Management SaaS Platform

Contract Number	
Project Name	CleanHub
Party A (Client)	Cheikh Diaw
Party B (Developer)	Ying Jiahui
Date of Signing	
Place of Signing	Wuxi, China
Validity Period	01 May 2026 — 01 May 2027

Printed by the Ministry of Science and Technology of the People's Republic of China

PREAMBLE

Party A hereby entrusts Party B with the research and development of the CleanHub project and pays Party B the research and development expenses and remuneration. Party B accepts this commission and undertakes this research and development work.

Based on equal consultation and the genuine and full expression of their respective intentions, and in accordance with the provisions of the Civil Code of the People's Republic of China, both parties have reached the following agreement, which shall be jointly observed by both parties.

CONTRACTING PARTIES

Party A — Client (Commissioner)

Name / Company	
Address	Dakar, Senegal
Legal Representative	Cheikh Diaw
Project Contact	Cheikh Diaw
Contact Information	iWash Group
Mailing Address	Dakar, Senegal
Telephone	+221 77 866 54 09
Email	cheikhdiaw80@gmail.com

Party B — Developer (Commissioned Party)

Name	Ying Jiahui
Address	Room 803, Building 15, Hongcheng Garden, Dongting Street, Xishan District, Wuxi City
Legal Representative	Ying Jiahui
Project Contact	Ying Jiahui
Telephone	17766470887
Email	yannqing020803@gmail.com

ARTICLE 1 — RESEARCH & DEVELOPMENT REQUIREMENTS

1.1 Technical Objectives

This project aims to develop a SaaS management system for pressing, car wash and laundry businesses. Its technical objective is to build an enterprise-level operational management platform that is process-standardised, data-transparent and easily scalable. The system shall achieve the following objectives:

- Centralised management of all core business entities: clients, orders, garments, vehicles, payments, staff — with full traceability from intake to delivery.
- Owner mobile dashboard enabling real-time monitoring of all branches from a smartphone, with fraud alerts, Z report and per-cashier statistics.
- SaaS subscription billing engine with Wave and Orange Money integration, automatic grace period and automatic suspension on non-payment.
- Multi-tenant architecture with physical data isolation per tenant via PostgreSQL Row-Level Security (RLS), guaranteeing data sovereignty for each client.
- Native application: Next.js Full-Stack + Capacitor for web/mobile, Electron.js for Windows — no browser, no website.

1.2 Technical Content

The technical content of this project revolves around three core modules:

- POS module and order lifecycle management: full process management from intake to delivery, quick client identification by name, phone, loyalty card or old order number, garment/vehicle information entry with defect notes and photos, automatic price and pickup date calculation, state machine model driving each item through production stages, real-time status updates via barcode scanning at production stations.
- Hardware integration and offline collaboration module: native integration with receipt printers, washable label matrix printers, barcode scanners, cash drawers, portable Bluetooth printers and TPE payment terminals. USB, Bluetooth and WiFi connection support. Full offline mode — POS, order creation and label printing work without network; data is automatically synchronised on reconnection.
- Multi-tenant SaaS and data analysis module: single codebase for Web, Windows (Electron), iOS and Android. Login via pressing code + password. Data isolation via PostgreSQL RLS. Real-time dashboards and multi-dimensional reports (daily Z report, revenue analysis, client analysis, overdue orders, receivables). Wave and Orange Money API integration, WhatsApp Business API, AI stain detection (future version).

1.3 Technical Approach and Roadmap

This project follows an implementation roadmap based on the principles of stability, rapid delivery and industrial-grade standards. The specific methods are:

- Technology selection: Next.js backend (Node.js + TypeScript), PostgreSQL with RLS, Prisma/TypeORM ORM, Redis for sessions and caching, S3-compatible storage for unstructured files.
- Architecture: integrated Next.js full-stack, standardised RESTful interfaces, state machine model for order lifecycle, lightweight approval processes via chained record table, multi-tenant isolation via RLS, offline mode via local IndexedDB/SQLite.
- Development process: Git branch strategy (main/dev/feature), CI/CD via GitHub Actions or GitLab CI, unit tests (coverage $\geq 70\%$), integration tests, Swagger/OpenAPI documentation.

1.4 Language Requirements

The system interface must support French (fr-FR) and English (en). Users can switch languages instantly in the application. All interface elements, system notifications (WhatsApp/SMS), PDF invoices, receipts and exported reports must be available in bilingual versions. Tenants can configure a default language in the administration panel.

ARTICLE 2 — RESEARCH & DEVELOPMENT PLAN

Within 30 days of the effective date of this contract, Party B shall submit a research and development plan to Party A containing the following elements:

1. Content of the delivery plan and feature list
2. Detailed schedule with weekly milestones
3. Budget breakdown

ARTICLE 3 — DELIVERY SCHEDULE

AMENDMENT PROPOSED BY PARTY A

The delivery schedule below reflects Party A's requirements. The complete list of features to be delivered is defined in the CleanHub functional specifications document (90 pages) provided on 1 May 2026. Party B shall deliver all features in that document. If Party B proposes a phased delivery approach, the phases and their content must be agreed in writing by both parties before development begins.

Overall plan	1 May 2026 to 1 May 2027
Target delivery	Before 1 September 2026 — Party B delivers the complete software for trial use
Trial period	1 month minimum — Party A tests all features on real data
Corrections	Party B fixes all issues reported during the trial period at no additional cost
Formal acceptance	Before 1 November 2026 — Party A signs written acceptance document confirming all features of the specifications document are delivered and operational

The complete list of features to be delivered is defined exclusively by the CleanHub functional specifications document (90 pages) provided to Party B on 1 May 2026. This document is the sole reference for scope. Party B may propose a delivery sequence (delivering features in batches) but all features must be delivered and accepted before the final payment is released.

ARTICLE 4 — TECHNICAL DOCUMENTS & COOPERATION

! AMENDMENT PROPOSED BY PARTY A

The functional specifications document must be initialled (paraphed) on every page by both parties before development begins. This signed document becomes the sole contractual reference for the scope of work.

The technical information and cooperation matters that Party A shall provide to Party B are as follows:

- Technical documents: CleanHub functional specifications document (90 pages) provided on 1 May 2026.
- Initialling obligation: before any development begins, both parties shall initial (paraph) every page of the CleanHub functional specifications document. The signed copy shall be attached to this contract as Annex A and shall constitute the sole contractual reference for the scope of work. No feature may be added, removed or modified without a written amendment signed by both parties.
- Delivery time and method: 1 May 2026, online delivery.
- Other cooperation: The software system is deployed on a cloud server. Party B may assist Party A in leasing cloud servers and will inform Party A in advance of the configuration and price. Server leasing costs shall be borne by Party A. Upon completion, each party shall keep its own archives.

ARTICLE 5 — REMUNERATION & PAYMENT TERMS**! AMENDMENT PROPOSED BY PARTY A**

The following payment terms replace those in the original contract draft. These terms must be agreed and confirmed in writing before the contract is signed.

5.1 Total Amount

The total amount of research and development expenses and remuneration is RMB 160,000.

SCOPE CLAUSE — NON-NEGOTIABLE

This amount of RMB 160,000 covers the ENTIRE CleanHub specification document as defined in the functional specifications document (90 pages) provided to Party B on 1 May 2026. No additional fees may be claimed by Party B for features already included in this document. Any new feature not present in the specifications document shall require a written amendment signed by both parties.

5.2 Payment Schedule

Party A shall pay in three instalments as follows:

Payment	Amount	Trigger	Condition
1st instalment	30% (RMB 48,000)	Contract signing — within 1 month	Conditions the start of development work
2nd instalment	40% (RMB 64,000)	Software delivery — within 10 working days of delivery	Party A tests and confirms the software is fully operational
3rd instalment	30% (RMB	End of 1-month trial period	Written acceptance by Party A

	48,000)		confirming all features of the specifications document are delivered and compliant
--	---------	--	--

No subsequent instalment shall be paid before written and signed validation by Party A of the previous milestone. Party A has 30 days after each delivery to perform tests and notify acceptance or required corrections.

5.3 Payment Method

Payment method: bank transfer, Alipay or WeChat, by mutual agreement confirmed in writing.

Bank	Industrial and Commercial Bank of China
Address	68-76 Changliu Road, Shanghai
Account Number	6222031001055403815

ARTICLE 6 — USE OF FUNDS

The research and development expenses shall be used by Party B in accordance with actual expenditures. Party A has the right to inspect Party B's research and development work and the use of R&D funds within the limits of its right to information, without interfering with Party B's normal work.

ARTICLE 7 — CONTRACT AMENDMENTS

Any amendment to this contract must be agreed upon by both parties and confirmed in writing. However, under any of the following circumstances, one party may request the other to amend its rights and obligations, and the other party shall respond within the agreed period; failure to respond within the agreed period shall be deemed as consent.

ARTICLE 8 — TECHNOLOGICAL RISKS

In the event of failure or partial failure of the research and development due to insurmountable technical difficulties under the current technological level, losses shall be reasonably shared by Parties A and B within the scope of the commissioned development expenses. Party B shall not bear the remaining losses.

The basic conditions for identifying a technological risk are:

4. This contract project presents sufficient challenges under current technological conditions.
5. The failure of the research and development is deemed reasonable and without any subjective fault on the part of Party B.

ARTICLE 9 — THIRD-PARTY DISCLOSURE

If, during the performance of this contract, the technology subject to research and development has been disclosed by third parties (including through patent rights), either party shall notify the other of contract termination within the agreed timeframe. Failure to notify within the stipulated period that causes losses to the other party shall result in liability for compensation.

ARTICLE 10 — CONFIDENTIALITY OBLIGATIONS

AMENDMENT PROPOSED BY PARTY A

The confidentiality period has been extended from 1 year to PERPETUAL (unlimited lifetime) for both parties. The reuse prohibition clause has been added.

Party A:

- Confidential content: technical documents, materials, business information and trade secrets related to this contract.
- Personnel concerned: staff directly or indirectly involved in the technology of this contract.
- Confidentiality period: PERPETUAL — without time limit, for the entire lifetime of the software and beyond the end of this contract.
- Liability for breach: liability incurred in accordance with applicable laws. Compensation equal to 20% of the total contract amount per breach incident.

Party B:

- Confidential content: technical documents, materials, business information, trade secrets, source code, technical architecture, client database and any information related to this contract.
- Personnel concerned: staff directly and indirectly involved in the technology of this contract.
- Confidentiality period: PERPETUAL — without time limit. Party B undertakes never to disclose, share, resell or reuse the source code, architecture or specifications of the CleanHub project, even after the end of this contract and even after dissolution of its entity.
- Reuse prohibition: Party B expressly undertakes not to develop, for itself or for any third party, a competing software on the African pressing, laundry or car wash market, using all or part of the specifications, code or architecture developed under this contract.
- Liability for breach: compensation equal to 100% of the total contract amount in case of proven violation.

ARTICLE 11 — MANDATORY DELIVERABLES

AMENDMENT PROPOSED BY PARTY A

The following deliverables are ALL mandatory and included in the total price of RMB 160,000. None of them may be invoiced separately. Any deliverable not provided shall constitute a breach of contract and the final payment shall be withheld until all deliverables are complete.

11.1 Software Package

- Complete system software: source code, database scripts, configuration files, deployment scripts and environment documentation.
- Delivered within 10 working days of final acceptance, via the GitHub/GitLab repository controlled by Party A.

11.2 End-User Manual (Pressing Manager & Cashier)

Party B shall deliver a complete end-user manual intended for the pressing manager and cashier who use CleanHub daily. This manual is written in simple language with screenshots — no technical background required.

Target readers	Pressing manager, cashier, delivery staff — non-technical users
Language	French (primary) + English version
Format	PDF (printable) + Word (.docx) editable
Content	How to: receive a client, create an order, print garment labels, record garment defects and take a photo, collect payment (Wave / Orange Money / cash), perform partial delivery, search for a client by phone, view the daily Z report, use the owner mobile app, manage loyalty points, process a complaint
Illustrations	Screenshot of every screen, with numbered annotations — no technical jargon
Delivery deadline	No later than 2 weeks after final software sign-off

11.3 Technician Manual (Installation, Configuration & Troubleshooting)

Party B shall deliver a complete technician manual intended for the field technician who installs CleanHub at client premises, configures it and provides on-site troubleshooting.

Target readers	CleanHub field technicians — technically trained, not developers
Language	French (primary) + English version
Format	PDF (printable A5 format for field use) + Word (.docx) editable
Content — Installation	Step-by-step installation on Windows PC and Android tablet/smartphone. Configuration of all printers (thermal, matrix, A4 laser, Bluetooth portable, adhesive label). Bluetooth scanner pairing. Cash drawer connection and test. Economy mode setup. Wave and Orange Money API configuration. WhatsApp Business setup. Tenant creation and initial configuration.
Content — Client Training	60-minute client handover training script. How to train a pressing manager to use the POS, create orders, collect payments, run Z report, use the mobile app.
Content — Troubleshooting	Diagnosis and fix for the 20 most common problems: printer not detected, scanner not pairing, app not launching, payment API error, WhatsApp not sending, offline sync not working, label not printing, admin password lost. Escalation procedure to Level 2 support.

Content — Updates	Software update procedure without data loss. Pre-update backup. Post-update verification checklist.
Client sign-off sheet	One-page document signed by the client at the end of each installation confirming: installation complete, training received, hardware working, support contact provided.
Delivery deadline	No later than 2 weeks after final software sign-off

11.4 On-Site Technician Training Session

Party B shall conduct at least one live technician training session — by video call or in person — to train Party A's designated technicians on the complete installation, configuration and troubleshooting of CleanHub.

Format	Video call (screen sharing) or in person — minimum 4 hours
Participants	All technicians designated by Party A — minimum 2 technicians
Content covered	Full installation walkthrough (Windows + Android), all printer types including economy mode, scanner pairing, payment API configuration, WhatsApp Business setup, client training script, troubleshooting of the 20 most common problems, software update procedure
Recording	The session must be recorded and the recording provided to Party A within 48 hours — Party A may use the recording to train future technicians
Q&A session	Minimum 1 hour dedicated to questions from technicians — technicians may ask any question about installation or troubleshooting
Follow-up support	After the training session, Party B shall respond to technical questions from Party A's technicians within 24 hours for a period of 30 days
Scheduling	The training session shall be scheduled no later than 2 weeks after final software sign-off, at a time agreed by both parties

11.5 Online Training Platform (6 modules)

Party B shall build and host an online training platform accessible 24/7. The platform must contain 6 modules covering installation, configuration, client training, troubleshooting, updates and maintenance. Each module includes a video (5-10 min), illustrated PDF, practical exercise and validation quiz (80% minimum). A downloadable CleanHub Technician Certificate is issued on completion. The platform must remain hosted for a minimum of 3 years after delivery. See Article 26.5 for full details.

ARTICLE 12 — ACCEPTANCE CRITERIA

The research and development results shall be accepted according to the following standards: on-site or online functional testing. The testing period is one month. The final version shall be based on the

functional requirements document confirmed by Party A (CleanHub specifications document, 90 pages, provided 1 May 2026).

ARTICLE 13 — NON-INFRINGEMENT GUARANTEE

Party B guarantees that the research and development results delivered to Party A do not infringe upon the legitimate rights and interests of any third party. If a third party accuses Party A of technological infringement, Party B shall provide evidence of independent development.

ARTICLE 14 — INTELLECTUAL PROPERTY — NON-NEGOTIABLE

NON-NEGOTIABLE CLAUSE

All intellectual property rights — copyright, patent, source code, architecture, database, CleanHub trademark — belong exclusively and irrevocably to Party A. Party B has no ownership, exploitation or reuse rights over any element arising from this contract.

- The copyright, patent application rights, source code ownership and software ownership upon completion of development belong EXCLUSIVELY and IRREVOCABLY to Party A.
- The patent right belongs entirely to Party A. Party B enjoys only the right of authorship (name mention in technical documents). Party B may under no circumstances file a patent on all or part of the software, its architecture or its algorithms.
- The right to use, transfer and licence trade secrets belongs to Party A.
- Party A has the right to use the results of this project to apply for recognition as an innovative enterprise, high-tech enterprise and various government awards. Party B shall provide all necessary documentary assistance.
- Party A has the right to use, modify, transfer or licence the software to any third party, without prior authorisation from Party B and without additional fees.
- Source code access: Party A shall control the source code repository (GitHub or GitLab) from the FIRST DAY of development. Party B shall perform daily commits. At no time shall Party B be the sole holder of the source code.
- Party B shall transfer to Party A the entirety of the source code, database scripts, configuration files and all technical documentation within 10 working days following final delivery.

ARTICLE 15 — TRANSFER RESTRICTION

Party B shall not transfer the research and development results to any third party before delivering them to Party A.

ARTICLE 16 — RIGHT OF AUTHORSHIP

The research and development personnel of Party B who complete the project under this contract have the right to be named as creators of the technical achievements in relevant technical achievement documents and to receive the corresponding honorary certificates and awards.

ARTICLE 17 — TRAINING & TECHNICAL ASSISTANCE

After delivery of results, Party B shall, upon Party A's request, provide training and technical assistance to personnel designated by Party A.

- Scope: all related technologies developed in this project.
- Location and method: online (remote screen sharing).
- Fees and payment method: to be negotiated separately.

ARTICLE 18 — AFTER-SALES SERVICE & FREE MAINTENANCE

Party B shall provide Party A with free technical maintenance services for twelve (12) months from the date of final project acceptance.

Scope of free maintenance:

- Bug fixing: functional anomalies, data errors and display anomalies caused by code defects — Party B shall respond and fix promptly after written notification from Party A.
- Compatibility maintenance: operating system updates (Windows, Android, iOS), browser kernel updates, third-party library security patches.
- Deployment support: system redeployment, database migration, SSL certificate renewal and other maintenance operations.
- Data recovery support: in the event of data corruption due to unforeseen circumstances, Party B shall assist Party A in recovering data from backup.

Not included in free maintenance:

- New feature development: new modules, new features and new hardware adaptations outside the scope of this contract.
- Major functional changes: substantive modifications to the business logic of existing functions.
- Third-party service changes: adaptation work required due to interface changes by Wave, Orange Money and WhatsApp Business API.
- Problems caused by Party A's own code modifications.

Response time commitments:

P0 — Critical	System crash, login failure, core business interruption
P1 — High	Functional anomaly, data error, with temporary workaround
P2 — Normal	Display issue, non-critical anomaly

After the free maintenance period expires, both parties may sign a separate Technical Maintenance Contract, with fees negotiated separately.

ARTICLE 19 — LIABILITY FOR BREACH OF CONTRACT

Party B breaches Art. 2 or 3 (plan/schedule)	Penalty: RMB 20,000
Party B breaches Art. 11 or 12 (delivery/acceptance)	Late penalty: 1% of amount incurred
Party B breaches Art. 15 (transfer restriction)	Compensation: 1% of amount incurred
Party A breaches Art. 4 (technical documents)	Penalty: RMB 30,000
Party A breaches Art. 5 (payment)	Compensation: 0.1% of amount incurred per day
Either party breaches Art. 10 (confidentiality)	Compensation: 1% of amount incurred (minimum)

ARTICLE 20 — SUBSEQUENT IMPROVEMENTS

Party A has the right to use the research and development results for subsequent improvements. During the testing period, any improvements requested by Party A shall be made free of charge by Party B; software ownership remains with Party A.

Subsequent improvements based on the core architecture of this software belong to Party A. If Party A entrusts Party B with updating, upgrading or maintaining software functions, both parties may negotiate and sign a supplementary agreement, with costs borne by Party A.

ARTICLE 21 — PROJECT CONTACTS

Party A shall designate a project contact. Party B designates Ying Jiahui as its project contact. Project contacts shall complete assigned tasks according to agreed timelines, prevent personnel changes from impeding performance, and guarantee the contract is performed to appropriate standards.

ARTICLE 22 — CONTRACT TERMINATION

Either party may terminate this contract by notifying the other in the event of: (1) force majeure or technological risks; (2) the technology presenting sufficient difficulty to constitute a reasonable failure

under current conditions; (3) a third party disclosing the same technological achievement during performance of the contract.

ARTICLE 23 — DISPUTE RESOLUTION

Any dispute arising from or related to the performance of this contract shall first be settled through negotiation and mediation. If negotiation and mediation fail, the dispute shall be resolved by submission to the Wuxi Arbitration Commission.

ARTICLE 24 — DEFINITIONS & INTERPRETATIONS

All definitions and interpretations of technical terms used in this contract and its annexes must be clear, precise, standardised and professional, avoiding any ambiguity or misunderstanding. Local colloquial expressions are prohibited. In case of doubt, the English version shall prevail.

ARTICLE 25 — TECHNICAL ANNEXES

Technical background information	None
Feasibility study report	None
Technical evaluation report	None
Technical standards and specifications	CleanHub Functional Specifications Document — 90 pages — provided 1 May 2026
Original design documents	None

ARTICLE 26 — ADDITIONAL PROVISIONS — AMENDMENTS BY PARTY A

CLAUSES ADDED BY PARTY A

The following provisions are added by Party A. They constitute non-negotiable conditions for the signing of this contract.

26.1 Mandatory Benchmark Study BEFORE Development

Party B undertakes to purchase and actively use the following Chinese pressing management software for a minimum of two (2) weeks before starting any development: e 洗衣, 洗呗, 衣管家. Party B shall then submit to Party A a written benchmark report documenting the features, strengths and weaknesses of these software products, and how CleanHub compares and improves upon them.

The start of any development work is strictly conditional on Party A's receipt and written approval of this benchmark report. Any development started before approval of the benchmark report shall be considered a material breach of contract.

26.2 GitHub / GitLab Access from Day One

Party A shall control the source code repository (GitHub or GitLab) from the first day of development. Party B shall have contributor access to push code. Party B undertakes to perform daily commits documenting the progress of work. At no time shall Party B be the sole holder of the source code. In the event of contract termination for any reason, Party A retains all code already produced without additional compensation.

26.3 Mandatory Weekly Demonstrations

Party B undertakes to organise a live demonstration of progress (screen sharing) with Party A every week, on a day agreed by both parties. This demonstration shall show the features developed and fully operational since the previous week. The absence of two consecutive demonstrations without valid written justification shall be considered a contractual breach equivalent to the breach of Article 3.

26.4 Ownership of the CleanHub Brand

The CleanHub brand, logo, domain name and any associated visual identity belong exclusively to Party A. Party B has no rights over the brand and is prohibited from using it for its own commercial purposes, including in portfolios, case studies, marketing materials or any public communication, without the prior written consent of Party A.

26.5 Technician Training Programme — Mandatory Deliverable

NON-NEGOTIABLE — MANDATORY DELIVERABLE

The technician training programme is a mandatory contractual deliverable included in the total price of RMB 160,000. It must be delivered no later than 2 weeks after the formal software sign-off. Without this deliverable, the final payment will not be released.

CleanHub is deployed by field technicians who travel to client premises to install, configure and provide on-site training. Party B must deliver the following training deliverables:

- Online Training Platform (6 modules): Party B shall build and host an online training platform accessible 24/7 from any smartphone or PC. The platform shall contain 6 training modules covering: (1) Hardware installation on Windows and Android, (2) Printer and scanner configuration including economy mode, (3) Tenant setup and payment API configuration, (4) Client handover training script for pressing managers, (5) Field troubleshooting for the 20 most common problems, (6) Software update procedure. Each module shall include a video (5-10 minutes), an illustrated PDF guide, a practical exercise and a validation quiz (80% minimum to pass). A downloadable CleanHub Technician Certificate shall be issued upon completion of all 6 modules.
- Field Manual: Party B shall deliver a printed field manual in French AND English (two separate bilingual versions), in printable PDF format and editable Word (.docx) format. The manual shall cover: pre-installation checklist, step-by-step installation with screenshots, 60-minute client training script, 1-page troubleshooting quick reference card for the 15 most common field problems, support contact details, and a client sign-off sheet to be signed at the end of each installation.

- **Hosting duration:** the online training platform must remain accessible for a minimum of 3 years after final delivery. Party B shall notify Party A at least 3 months before any planned shutdown.
- **Updates:** the training platform and field manual must be updated within 4 weeks of each major CleanHub version release that affects installation, configuration or hardware setup.

26.6 General Provisions

Feature updates, system upgrades and long-term maintenance services after the 12-month free maintenance period are not within the scope of this contract. If Party A wishes to entrust these services to Party B, the fees and service content shall be negotiated separately and formalised in a written supplementary agreement.

ARTICLE 27 — NUMBER OF COPIES

This contract is made in four (4) original copies, each having equal legal effect. Party A shall retain two copies and Party B shall retain two copies.

ARTICLE 28 — ENTRY INTO FORCE

This contract shall come into effect upon signature and seal by both parties. All previous oral or written agreements between the parties regarding the subject matter of this contract are superseded by this document.

SIGNATURES

By signing below, both parties confirm that they have read, understood and agree to all terms and conditions of this contract.
